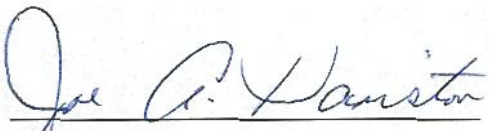
Message from the Superintendent
Baltimore County Public Schools

I am pleased to present the 2007-2008 Maryland Report Card Performance Report for Baltimore County Public Schools (BCPS). The *Blueprint for Progress*, introduced in 2000, and the federal *No Child Left Behind Act of 2001* both establish high standards for student achievement and teacher quality. The *Blueprint for Progress* is the framework that guides our vision, beliefs, goals, strategies, and performance indicators and reflects our firm commitment to strict accountability and high standards in education.

Since the inception of the *Blueprint for Progress*, Baltimore County Public Schools has continued to make steady progress in accelerating the achievement of all students. Student performance on the Maryland School Assessment (MSA) has continued to improve and BCPS will remain on course.

I want to thank every individual who has been a part of our success. It is important that each one of us continue to strengthen our commitment and involvement in student learning and achievement. By standing together, we can accomplish great results.



Joe A. Hairston
Superintendent of Schools

Schools in Need of Improvement

Schools in Need of Improvement

The Maryland State Department of Education, in accordance with the requirements of the federal No Child Left Behind Act of 2001, has identified schools that have not made annual targets for two or more consecutive years in the same reported area. The number and percent of schools in each school system, the names of the schools, and the year identified follow. Schools are placed in one of two pathways: Comprehensive Needs or Focused Needs. They are further identified according to stages (Developing or Priority) based on the number of years the school has been identified for improvement.

FP – Focus Priority; FD – Focus Developing; CP – Comprehensive Priority; CD – Comprehensive Developing

SCHOOL	YEAR IDENTIFIED	STATUS
Allegany County	**(1 school, 4%)**

ADEQUATE YEARLY PROGRESS (AYP)

Each year, schools, school systems, and the state are required to measure how much progress students are making in reading and mathematics.

By the end of the school year in 2013-2014, the federal No Child Left Behind Act requires that 100% of students be proficient or above proficient in reading/language arts and mathematics. Schools, school systems, and the state must make yearly targets in order to reach the 100% goal. This is called Adequate Yearly Progress (AYP). The yearly targets are called Annual Measurable Objectives.

To make AYP, schools must achieve the Annual Measurable Objectives in reading and mathematics for the all students group and for each student subgroup, and they must test at least 95% of the students. In addition, elementary and middle schools must meet yearly targets for attendance, and high schools must meet yearly targets for graduation. School systems and the state must meet the yearly targets in reading and mathematics in all categories and must meet both the attendance and graduation targets for all students.

Results In Nine Categories

The results for students are reported in nine different categories. The categories are: all students, students who are receiving free or reduced price meals (FARMS), students receiving special education services, students who know no or very little English (limited English proficient), and five racial/ethnic groups.

Results for these groups, the disaggregated data, may be found on the web site of the Maryland State Department of Education at MdReportCard.org.

Schools and Systems in Improvement

Schools that do not make the targets, the Annual Measurable Objectives, in the same subject or other reported area for two consecutive years are identified for School Improvement. A school system that does not meet the annual targets in the same reported area for two consecutive years *at the elementary, middle and high school levels* is identified for System Improvement. The list of Schools in Improvement may be found on the web at MdReportCard.org.

Participation Rate

Participation Rate is based on the number of students enrolled on the day of testing. Federal regulations require that at least 95% of the students enrolled on the testing day take the test. Students who are unable to take the test at the regular time or during the make-up time because of a medical emergency do not count against the school's participation rate.

Attendance Rate

Attendance Rate is the percentage of students in school for at least half of the average school day during the school year. Attendance is an AYP measure for elementary and middle schools. Yearly targets are set for attendance so that by the end of school year 2013-14, the state, schools, school systems will achieve an attendance rate of at least 94%.

Graduation Rate

Graduation Rate is the percentage of students who receive a Maryland high school diploma during the reported school year. It is a required AYP measure for high schools. Yearly targets are set for Graduation Rate so that by 2013-2014, all schools will meet the performance standard of a 90% Graduation Rate.

Dropout Rate (when Graduation Rate is not available)

Dropout Rate is the percentage of students dropping out of school in grades 9 through 12 in a single year. Students who re-enter school during the same year in which they dropped out are not counted as dropouts.

Teacher Qualifications

The percentage of teachers in each category is based on the number of teachers who have credentials and are teaching core academic subjects as defined by the federal government under the No Child Left Behind Act. The core academic subjects are English, reading or language arts, mathematics, science, foreign languages, civics and government, economics, arts, history and geography. Teachers who are teaching other subjects are not included in these totals.

Standard Professional Certificate. A Standard Professional Certificate indicates the teacher meets all certification requirements.

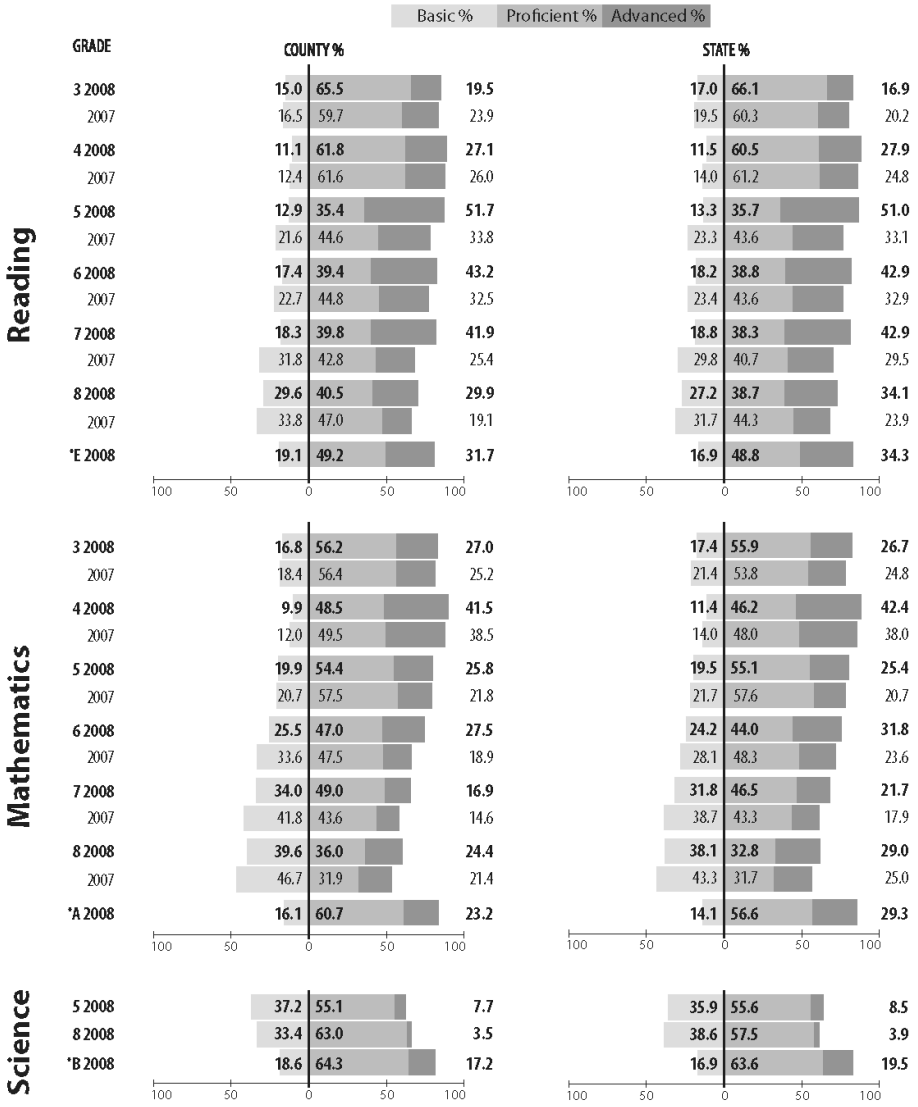
Advanced Professional Certificate. The Advanced Professional Certificate requires three years of satisfactory professional school-related experience, and a master's degree or a minimum of 36 semester hours of post baccalaureate course work.

Resident Teacher Certificate. The Resident Teacher Certificate is issued to a teacher in an approved alternative preparation program at the request of a local school system superintendent.

Conditional Certificate. The Conditional Certificate is issued only at the request of a local school system superintendent to an applicant who has a bachelor's degree but does not meet all certification requirements.

Highly Qualified Teachers. "Highly qualified" is specifically defined by federal law. Teachers must meet minimum requirements both in content knowledge and teaching skills. Teachers must have a bachelor's degree, full state certification and demonstrate content knowledge in the subjects they teach.

Baltimore County MSA Proficiency Levels



* *E: English; A: Algebra/Data Analysis; B: Biology*

Approximately 99% of Maryland students take MSA. The Basic Level is below the goal set for all students.

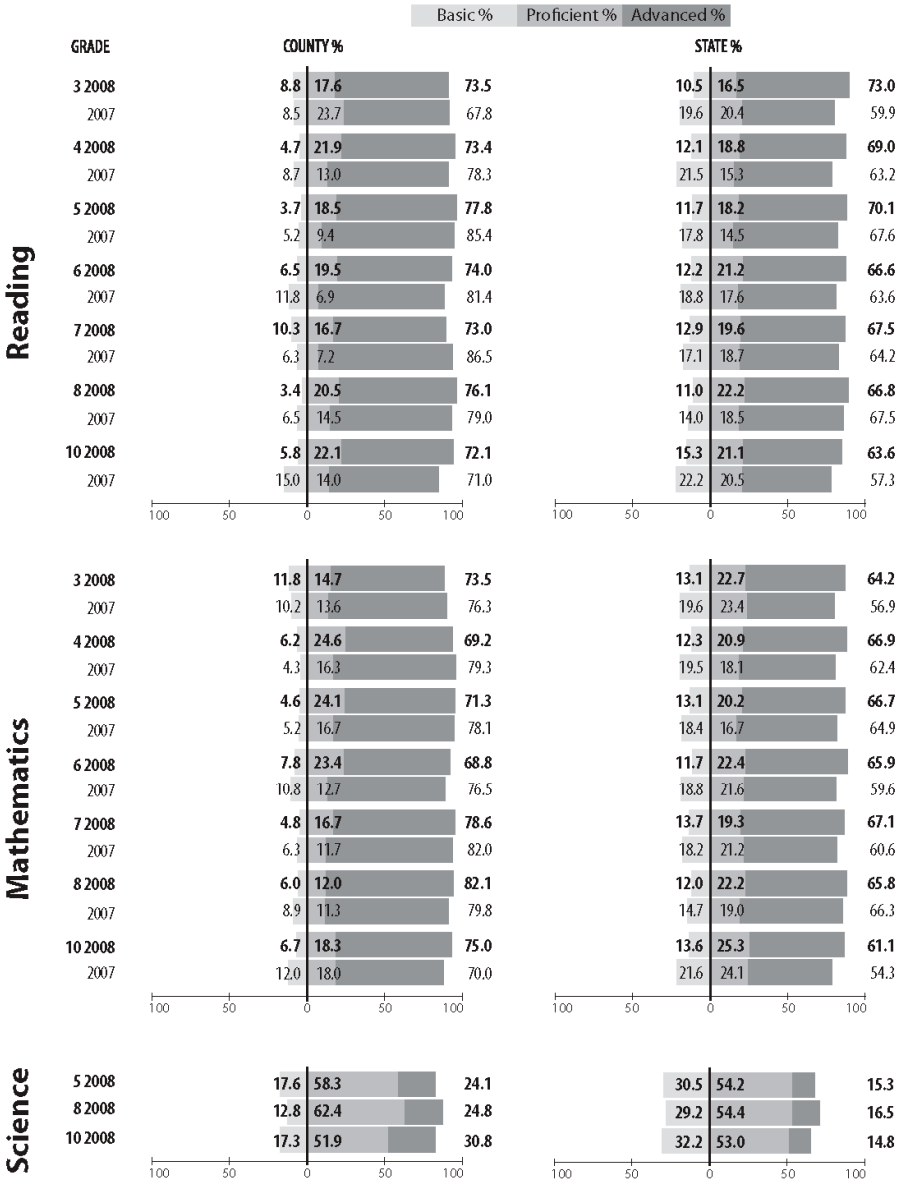
Maryland School Assessment (MSA)

The MSA measures what students in grades 3-8 know about reading and mathematics. High school performance is measured by the English and Algebra/ Data Analysis High School Assessment (HSA). Science was measured in grades 5 and 8 and by the Biology HSA starting in 2008. Science is not part of AYP. Performance is reported as the percent of students in each grade who achieved the Basic, Proficient, or Advanced standard. All students should be achieving at the Proficient or Advanced standard. Middle and high school special education students working on grade level content who may need an assessment that is more accessible for a student with disabilities may be eligible to take the Mod-MSA. This is determined by the Individualized Education Program (IEP) Team.

Description of MSA Proficiency Levels

	Reading:	English:	Mathematics:	Algebra/Data Analysis:	Science:	Biology:
Basic %	Students are unable to read and understand literature and passages of information that are written for students in their grade.	Students have difficulty comprehending grade-appropriate literature and applying language choices when writing.	Students show they have only partially mastered the skills and concepts that Maryland expects students to know and be able to do at this grade level.	Students show they have only partially mastered the skills and concepts defined in the Maryland Algebra/Data Analysis Core Learning Goals.	Students show they need more work to attain proficiency. They use minimal supporting evidence, and responses provide little or no synthesis of information.	Students demonstrate a minimal understanding of biology concepts, principles, and/or skills. Student responses indicate limited synthesis of information and understanding of scientific terminology.
Proficient %	Students can read text written for students in their grade, and they can demonstrate the ability to understand literature and passages of information.	Students can comprehend grade-appropriate literature and apply appropriate language choices when writing.	Students show they have an understanding of fundamental grade level skills and concepts and can generally solve entry-level problems in mathematics.	Students show they have an understanding of fundamental algebra/data analysis skills and concepts and can generally solve entry-level problems in algebra/ data analysis.	Students use supporting evidence that is generally complete with some integration of scientific concepts, principles, and/or skills.	Students demonstrate a realistic and rigorous level of achievement by providing evidence of an understanding of biology concepts and the ability to use scientific evidence to generally integrate scientific concepts, principles, and/or skills. Student responses indicate some synthesis of information and understanding of scientific terminology.
Advanced %	Students can regularly read text that is above their grade level, and they can demonstrate the ability to understand complex literature and passages of information.	Students can regularly comprehend and interpret complex literature and consistently apply appropriate language choices to write effectively.	Students show they can regularly solve complex problems in mathematics and demonstrate superior ability to reason mathematically.	Students can regularly solve complex algebra/data analysis problems and demonstrate superior ability to reason mathematically.	Students use scientific evidence to demonstrate a full integration of scientific concepts, principles, and/or skills.	Students demonstrate an exemplary level of achievement by providing evidence of a complete understanding of biology concepts and the ability to use scientific evidence to fully integrate scientific concepts, principles, and/or skills. Student responses indicate a complete synthesis of information and understanding of scientific terminology.

Baltimore County
Alt-MSA Proficiency Levels



Approximately 1% of Maryland students take Alt-MSA. The Basic Level is below the goal set for all students.

Alternate Maryland School Assessment (Alt-MSA)

The Alternate Maryland School Assessment (Alt-MSA) is taken by students with disabilities who cannot take the MSA even with the special accommodations they receive as part of their regular classroom instruction. The test measures the student's mastery of reading and mathematics content standards or appropriate access skills. Eligible students take the test in grades 3-8 and once during the high school grade band. Performance is reported as the percent of students in each grade who achieved the Basic, Proficient, or Advanced standard.
